 Charging power **60 - 120 kW**

Stekerr P2 is the winner of the iF Design Award 2023.

The new chapter

## Adriateh is a new manufacturer in the e-mobility market!

You may know us as one of the leading European manufacturers of self-service car washes, and now it's time to get to know us as an innovative manufacturer of electric vehicle chargers.

### Meet STEKERR

The word 'steker' comes from German, and Stekerr is from Sveta Nedelja! Stekerr is the brand with which we are entering the e-mobility, and our chargers are already available on the market.

### Connect with us

Complete solutions in the field of electric mobility are not the future for us, but the present.

Our own research and development department and more than 130 employees in the manufacturing and logistics facility covering 30,000 square meters enable us to interpret our own vision of electric mobility through a series of **extraordinary** devices.

### Key benefits

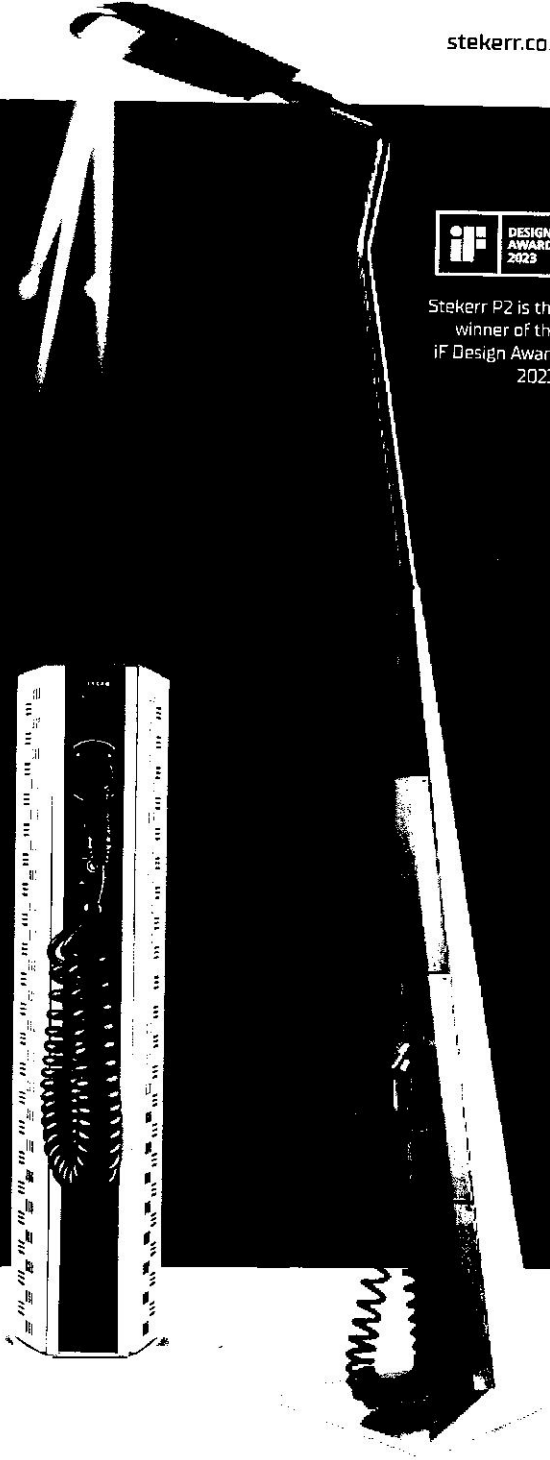

We advise you in the selection and planning of chargers for e-vehicles.

We build electric vehicle chargers on a 'turnkey' basis'.

Responsive team of service technicians, availability of spare parts.
